INCEPTION OF “ACE”

📌 Our Journey – ACE Industries

Established in **1980**, ACE Industries began its manufacturing journey under the visionary leadership of **Mr. M.H. Makani**, a distinguished **Chemical Engineer** from **U.D.C.T.** – one of the world’s premier technical institutes. With **over 45 years of extensive experience** in the **chemical and pharmaceutical industries**, Mr. Makani transformed ACE into a trusted name and **leader in the centrifuge manufacturing sector.**

To meet the growing demand and serve customers more efficiently, ACE expanded operations across key industrial hubs:

1980 – Vapi (ACE INDUSTRIES)

1989 – Mumbai (AIM INDUSTRIES)

2005 – Ankleshwar (ACE CHLORIDE)

2010 – Wada/Palghar (ACE INDUSTRIES INDIA PVT LTD.)

Driven by a deep understanding of industry needs and a clear vision, ACE Industries continues to deliver excellence in pharmaceutical machinery from **four strategic locations.**

VISION & MISSION

- ▶  Vision: To be the global leader in pharmaceutical machinery by delivering innovative, efficient, and sustainable manufacturing solutions that empower the health and wellness industry.”
- ▶  Mission : “We are committed to engineering high-quality pharmaceutical machinery that ensures precision, safety, and compliance, while continuously innovating to exceed the expectations of our clients and contribute to a healthier world.”

OUR STRENGTHS & CORE VALUES

- ☐ Own R&D Department – Driving innovation through continuous development
- ☐☐ Professional Engineers – Expertise that ensures quality focus in every detail
- ☐ Experienced Design Team – Crafting customized, efficient, and customer-centric solutions.
- ☐ Qualified Welders – Precision and strength built by certified professionals
- ☐ Well-Trained Workers – Skilled workforce ensures consistency and reliability
- ☐ Experienced Service Team – Keeping your operations running smoothly
- ☐ After-Sales Support Team – Reliable assistance for complete peace of mind
- ☐ ☐ Timely Delivery – Committed to on-time project execution without compromise

WHY CHOOSE US FOR CENTRIFUGE SOLUTIONS?

□ Engineering Excellence

4 Robust Bearing Housing Design For maximum stability, extended life, and reduced maintenance.

❑ **Zero Hold-up Design** Ensures complete product discharge, especially for MLR (Manual/Batch) centrifuges, Sparkler Filter Nutch Filters.

❑ **GERB Make Vibration Damper**: Industry-grade damping technology to minimize vibration, extend component life high.

❑ **High Performance** Advantage High G-Force Enables faster separation and higher efficiency.

❑ **High Filtration Rate** Improved clarity, better solid-liquid separation.

❑ Built Smart Genuine Raw Materials Quality-assured, traceable materials for structural integrity Branded Bought-out Items Trusted global components (e.g., motors, bearings, VFD) for superior reliability.

❑ Your Competitive Edge

- ✓ Lower operational risk
- ✓ Longer equipment life
- ✓ Reliable performance under critical conditions
- ✓ Timely Delivery of the machine

□ MANUFACTURING CAPABILITY

**ACE INDUSTRIES
INDIA PVT. LTD.**

□ □ End-to-End In-House Manufacturing

- ✓ Full control over design, fabrication, assembly, and testing.
- ✓ Minimizes dependency on external vendors, ensuring quality and speed.

□ □ State-of-the-Art Infrastructure

- ✓ Jumbo Lathe , Lasser cutting machines, balancing machines, Auto Buffing welding setups, and precision tools.
- ✓ Dedicated assembly bays for different centrifuge models

□ Fabrication Excellence

- ✓ High material thickness for durability and robustness
- ✓ Advanced welding techniques performed by certified welders
- ✓ Strict adherence to dimensional accuracy and tolerances

□ Precision Engineering

- ✓ Machined bearing housings, dynamic balancing, and fine alignment.
- ✓ In-process QC ensures component integrity at every stage.

□ Quality Assurance

- ✓ Stringent in-house testing and inspections (mechanical + performance)
Compliance with ISO standards and client-specific QA protocols.

Infrastructure, Workforce & Facilities

📍 Infrastructure

- ✓ Total Area: **9,300 sq. meters**
- ✓ Well-equipped premises with designated workspaces and storage facilities.

👤 Workforce

- ✓ Total Strength: **150+ personnel**
- ✓ On-site accommodation for engineers and workers

🏥 Employee Welfare & Benefits

- ✓ Comprehensive medical facilities and health insurance
- ✓ Food allowance for all staff
- ✓ Access to emergency hospital services

🏭 Machinery & Equipment

- ✓ > Lathe Machines > Laser Cutting > Bending Machine > Hydraulic Press
- ✓ > Balancing Machine > Milling machine > Welding machine > Auto Buffing

TYPE OF CENTRIFUGE

Kilo Lab / R&D Scale Centrifuge (Cake Capacity 1.5 Ltrs to 15 Ltrs)

- ✓ Designed for laboratory and research applications
- ✓ Suitable for small-scale testing and process development

Pilot Scale Centrifuge Machine (Cake Capacity 25 Ltrs to 75 Ltrs)

- ✓ Used for intermediate-scale production
- ✓ Bridges the gap between R&D and full-scale manufacturing

Manual Top Discharge Centrifuge (Cake Capacity 150 Ltrs to 500 ltrs)

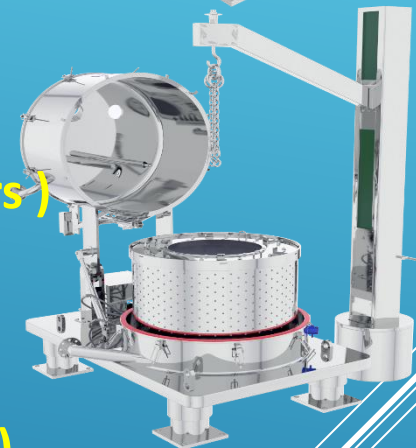

- ✓ Simple operation with manual material removal
- ✓ Cost-effective and easy to maintain

Top Bag Lifting Type Centrifuge (Cake Capacity 150 ltrs to 800 ltrs)

- ✓ Facilitates easy unloading of solid material
- ✓ Improves safety and reduces handling time

Multi-Cake Bottom Discharge Centrifuge (Cake Capacity 45 ltrs to 800 Ltrs)

- ✓ Allows multiple batch discharges without opening the lid
- ✓ Suitable for continuous or semi-continuous production

PRODUCT PORTFOLIO

Centrifuge Machines

- ✓ Used for solid–liquid separation in various industrial processes.

Fluid Bed Dryer

- ✓ Ensures uniform drying by fluidizing materials with heated air.

Tray Dryer / Vacuum Tray Dryer/Roto cone Vacuum Dryer

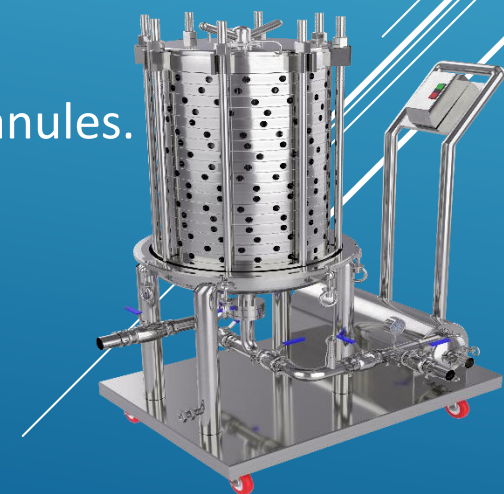

- ✓ For drying heat-sensitive materials under controlled conditions.

Sparkler Filter / Pressure Vacuum Nutch Filter

- ✓ Efficient filtration systems for liquid–solid separation.

Blenders – Octagonal, Ribbon, Double Cone

- ✓ Suitable for gentle and uniform blending of powders and granules.

PRODUCT PORTFOLIO

Rapid Mixer Granulator

- ✓ It is a high-speed mixing and granulation machine used in pharmaceutical and chemical industries. It ensures uniform mixing of dry powders and efficient wet granulation with controlled binder addition, resulting in consistent granule size, improved flow properties, and enhanced product quality.

Coating Pan

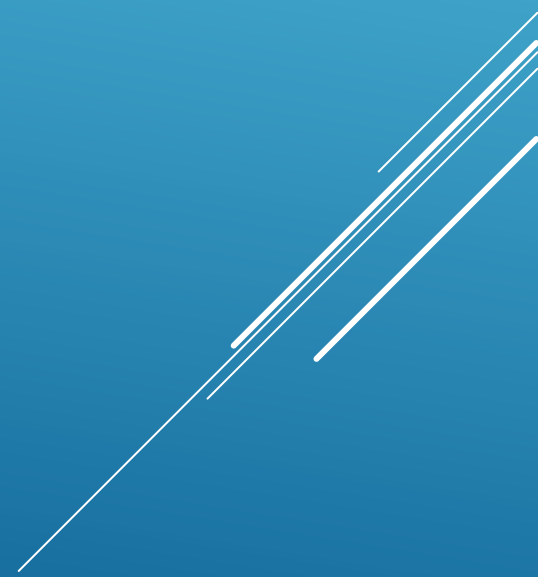

- ✓ A Coating Pan is used for uniform coating of tablets, pellets, or granules by spraying coating solution while rotating the product.

Multi-Mill / Co-Mill / CAD Mill

- ✓ Used for size reduction, granulation, and milling operations.

Shifter

- ✓ Used for sieving and grading of powder materials.

EXPORTS

CLIENTS & ACHIEVEMENTS

Prominent Clients

- ✓ SUN PHARMA , DR REDDY LAB , ZYDUS LIFE , MACLEODS PHARMA, MALLADI DRUGS , ALKEM LAB, FDC LTD, JUBILANT & MANY MORE
- ✓ MULTI ORGANIC , SUPRIYA LIFE , INTAS PHARMA , IOL CHEMICAL , SEKHMET PHARMA, LUPIN LTD , PARLE BISCUIT, DABOUR & MANY MORE
- ✓ International clients INCEPTA PHARMA, CHEMICAL INCORPORATION, PT. VAN AROMA , VARICON AQUA , BEXIMXO PHARMA & MANY MORE

Achievements

- ✓ Successfully installed **5000+ machines** in domestic and global markets
- ✓ ISO-certified manufacturing and quality management systems
- ✓ Proven track record of **on-time project delivery**
- ✓ Recognized for **custom-engineered solutions** meeting GMP standards
- ✓ Long-term partnerships built on trust and performance
